

Exercise: Applying color with hexadecimal values

1. If needed, open *update.html* in your editor and browser.
2. Change `navy` to **#006633**.
3. Save your changes and reload the page in your browser.
The level-two headings should now be green.
4. In your editor, add the following bold code:

```
<style>
h2 { color: #006633; }
footer { color: #063; }
</style>
```

5. Save your changes and reload the page in your browser.
Footer text has same green color.
6. In your editor, change the value for the `h2` rule to its shorthand equivalent.
7. Save your changes and reload the page in your browser.
There should be no change in the green heading color.
